PROFILE

A technical consultant with 15 years experience in bringing large, complex software implementations to fulfillment.
My mix of deep technical expertise bundled with passion for customer-facing roles have allowed me to excel in project delivery roles, which is where i thrive.
I am looking for roles that dibble both in tech and customer-facing aspects.

WORK EXPERIENCE

Tipalti (Automated Payment Solutions for SMBs and Enterprises) 2020- 2024

Customer onboarding manager

- Led >$1M enterprise implementation projects, supporting customers all across the globe.
- Worked on variety of industries, including tech startups, game studios, biotech and fintech customers.
- I played a key role in the acquisition and merger process, overseeing the implementation and setting up new internal processes to support the product.
- Played a lead role internally in bringing new talents up to speed as a lead mentor.
- Awards:
  - Highest revenue team member.
  - Highest CSAT score.
  - Hero of the company April 2024.

DocuSign ($2.5B revenue, 6800 employees) 2016 – 2020

Customer onboarding manager

- Taking lead roles in complex implementation in the cryptographic digital signing service space, across all sizes of companies, from SMBs through S&P 500 enterprises.
- Developed expertise in the banking and bio-pharma industries
- hands on integration building using various technologies (eg REST, SOAP) and CR< systems (eg Salesforce, SAP, workday, servicenow and more).
- Helped building internal methodologies and knowledgebase, used to accelerate customer success team's onboarding.

ClickSoftware (acquired by Salesforce.com) 2010 - 2016

Customer onboarding manager

- Responsibility for Solution design, Architecture and implementation for large enterprise customer.
- Overseeing the technical aspects of the project from inception to delivery, including need assessment and design workshops and documentation, coordinating R&D and QA, Configuration and education documentation, managing UATs and delivery.
- Assisting with project, escalation and crisis management.

Cordys 2009-2010

QA Engineer

- Responsible for product core stabilization and rapid new features assimilation.
